Day Surgery ICD-10-AM/ACHI/ACS Coding Course Enrolment Form

FAQ's

How Long Does Each Module Take To Finish?

Generally speaking each person is different, depending on current commitments. However the course you have chosen to undertake needs to be completed within 12 mths.

How Is The Course Offered ?

Each module is offered by way of distance education using either email or standard post.

Do I Get A Certificate?

Yes, each person who completes and passes the course will receive a Completion Certificate

Are There Any Additional Costs?

It is recommended that each student refer to a medical terminology text to complete exercises for each module, in addition to the exercises provided.

Most students will probably have access to some medical terminology text in their facility, however, if not, we have provided recommended texts.

This also applies to the ICD-10-AM, ACHI and ACS coding books at their facility, but you can purchase your own if needed. The only compulsory textbook is the 'Introduction to ICD-10-AM, ACHI and ACS' book which is used in conjunction with our material. This book is approx \$167.00 and can be purchased with the order form supplied by us.
